

Preparing your Landscape for Spring

JPA Landscape & Construction, Inc.

February is a short month and in this month's newsletter we are getting right to the point. Spring is right around the corner in March and there are some landscape items that need to be tended to. Spring brings new growth to your landscape which needs to be in good condition to manage water use and maintain healthy plant condition.

Weed Abatement

Now is the time to get those weed prone areas addressed. With the growth of the rest of your landscape in spring comes the growth of those unwanted parts as well. This brings us to our next item of discussion.

Fruit Inhibitor

We are running out of time for those properties that need to apply fruit inhibitor spray. Be sure to get this taken care of before your trees start to flower. This will reduce stains on your hardscape.

Aphid & Thrip Control

Be prepared and take care of these Spring pests before the sticky byproduct stain sidewalks and cars.

Tree Injections

Tree injections for disease control should occur before the

Irrigation Repairs

Irrigation clocks are scheduled to be activated in March,

Spring Color

On a brighter note, the time is approaching to install Sprin

best results.

that irrigation inspections have been approved and any outstanding repairs are made.

together. Send in your requests for spring color to enhance your shrub beds.

There are only 40 days left until Spring. Give your landscape the attention it needs and get the most out of your landscape this year. As always, feel free to contact us with any questions or concerns.

Sincerely,

Your Local Landscaper
