

What?

There is an **App**

for my **Plants?**

With the thirst for **knowledge**, forever growing, we thought we'd help **empower** our clients to learn more about the plants around them.

... and what better way...
...than with an app!

As many of our clients begin the process of converting their landscapes to **drought friendly ones**, we thought we could direct you all to the next wave of Plant ID App's.

"What is this plant?"

"Why aren't there flowers on it?"

"Why does this plant look dead?"

"Are these Aphids?"

"Is this dormant in the winter?"

"Is this plant safe for my pets?"

"How big will this bush get?"

"What would be the best plant for my yard?"

... you're sure to find all these answers and more
...with any one of these handy tools

Plant Identification ++

Identify plants in a snap. Take a picture with iPhone's camera, or pick a photo from your library, then using an algorithm it identifies the plant in the picture.

PlantNet

PlantNet is an application that allows you to identify plants simply by photographing them with your smartphone!

For those properties that have been sitting on the fence about bringing their landscapes into the **21st century** this a great way to get those folks started.

Most of the cities and counties fiscal year just started, meaning their Landscape Rebate programs are fully funded. That's free money just waiting to be use.

Our team can help start the process.

The List Doesn't Stop There!

There are hundreds of apps to choose from and we suggest picking the best one to fit you and your needs. So don't be shy, take a look!

Have a great summer from all of us here at
JPA Landscape & Construction, Inc.
